DETAILED ACTION

This office action is in response to the amendment filed March 24, 2005. Claims 1-78 have been withdrawn. Claims 79-154 are subject to the following restriction requirement.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 79-115, drawn to an optical apparatus having a grating coupled to 1st and 2nd flared waveguides with a hyperbolically curved sidewall, classified in class 385, subclass 37.
 - II. Claims 116-154, drawn to an optical apparatus having a plurality of light scattering elements arranged in a plurality of curved rows, the light scattering elements having wavefront converting properties, classified in class 359, subclass 629.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as using the plurality of curved rows of light scattering elements for wavefront converting properties. See MPEP § 806.05(d).

Art Unit: 2874

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
